

# 病 理 學 實 驗 — 教 學 玻 片 明 細 表

玻片 編號	診斷 (器官)
1	Ischemia (colon)
5	Liquefactive necrosis (brain)
8	Fat necrosis (soft tissue)
9	Caseous necrosis (lung)
10	Hyperplasia (endometrium)
11	Atrophy (endometrium)
14	Fatty change (liver)
17	Cholestasis (liver)
19	Calcinosis Cutis (buttock)
24	Hemochromatosis (liver)
26	Coagulative necrosis (skeletal muscle)
27	Tuberculosis with caseous necrosis
28	Normal appendix
29	Acute appendicitis
30	Oral ulcer (oral cavity)
31	Graunlation tissue (vagina)
32	Keloid and hypertrophy scar (skin)
33	Acute and chronic inflammation (gallbladder)
34	Chronic cholecystitis (gallbladder)
35	Abscess formation (leg)
36	Cryptoccocal infection (skin)
☆37	Cryptoccocal infection (skin) --GMS stain

☆38	Cryptoccocal infection (skin) --Mucicarmine stain
39	Mucormycosis (nasal mucosa)
☆40	Mucormycosis (nasal mucosa) --GMS stain
41	Aspergillus (nasal mucosa)
☆42	Aspergillus (nasal mucosa) --GMS stain
43	Lepromatous leprosy (skin)
☆44	Lepromatous leprosy (skin) --Fite stain
53	Hemorrhoids, thrombosis (anorectum)
54	Myxoma (heart)
56	Hemorrhoids (anorectum)
57	Ulcer, bleeding (stomach)
60	Adenomatous (villoglandular) polyp (colon)
62	GIST (stomach)
64	Mucinous adenocarcinoma (colon)
66	Cirrhosis, alcoholic and HCV-related (Liver)
68	Adenocarcinoam (colon)
71	Adenocarcinoma (colon)
72	Lymph node adenocarcinoma metastatic (colon)
73	Pleomorhpic adenoma (salivary gland)
74	Cholesterolosis(gallbladder)
77	Hepatoblastoma (liver)
78	Cirrhosis with marked inflammatory activity, HBV (liver)
80	Hepatocellular carcinoma, cirrhosis (liver)
82	Well differentiated cholangiocarcinoma with nerve invasion (Liver)
83	Adenocarcinoma (gallbladder)
86	Pituitary adenoma

<b>88</b>	Hashimoto thyroiditis
<b>91</b>	Nodular goiter
<b>92</b>	Follicular adenoma (thyroid)
<b>94</b>	Papillary carcinoma (thyroid)
<b>100</b>	Mature cystic teratoma (uterus)
<b>105</b>	Small cell carcinoma (lung)
<b>106</b>	Bronchopneumonia (lung)
<b>107</b>	Bulla (lung)
<b>108</b>	Squamous cell carcinoma (lung)
<b>109</b>	Squamous cell carcinoma (lung)
<b>110</b>	Squamous cell carcinoma (lung)
<b>111</b>	Adenocarcinoma (lung)
<b>113</b>	Bronchiectasis (lung)
<b>115</b>	Membranous glomerulopathy (kidney)
<b>116</b>	Minimal change nephropathy (kidney)
<b>117</b>	Diabetic glomerulosclerosis (kidney)
<b>118</b>	Crescentic glomerulonephritis (kidney)
<b>119</b>	Renal cell carcinoma (kidney)
<b>120</b>	Renal cell carcinoma, clear cell type (kidney)
<b>121</b>	IgA Nephropathy (kidney)
<b>122</b>	Infiltrating urothelial carcinoma (kidney)
<b>127</b>	Well differentiated keratinizing squamous cell carcinoma (urinary bladder)
<b>128</b>	Yolk sac tumor (testis)
<b>129</b>	Mature cystic teratoma (testis)
<b>130</b>	Seminoma (testis)
<b>132</b>	Nodular hyperplasia (prostate)

<b>133</b>	Adenocarcinoma (prostate)
<b>134</b>	Lympoid hyperplasia (lymph node)
<b>136</b>	Diffuse large B-cell lymphoma (lymph node)
<b>137</b>	Classical Hodgkin lymphoma, nodular sclerosis (lymph node)
<b>138</b>	Classical Hodgkin lymphoma, mixed cellularity (lymph node)
<b>145</b>	High grade squamous intraepithelial lesion (HSIL)
<b>146</b>	Cervical squamous cell carcinoma
<b>148</b>	Endometrioid carcinoma
<b>151</b>	Ovarian mucinous cystadenoma
<b>154</b>	Adenomyosis
<b>155</b>	Hydatidiform mole
<b>158</b>	Fibrocystic change and duct ectasia (breast)
<b>159</b>	Fibroadenoma (breast)
<b>160</b>	Ductal carcinoma in situ & invasive ductal carcinoma (breast) (invasive carcinoma no special type)
<b>162</b>	Lactational changes with mastitis (breast)
<b>163</b>	Osteosarcoma (bone)
<b>164</b>	Chondrosarcoma (femur)
<b>167</b>	Diffuse-type tenosynovial giant cell tumor (hip)
<b>170</b>	Well differentiated squamous cell carcinoma (tongue)
<b>171</b>	Pleomorphic adenoma (parotid gland)
<b>172</b>	Pleomorphic adenoma (parotid gland)
<b>173</b>	Warthin's tumor (parotid gland)
<b>175</b>	Angiofibroma (nasopharynx)
<b>177</b>	Malignant melanoma (eye ball)
<b>179</b>	Wilms' tumor anaplastic histology (kidney)

<b>186</b>	Neuroblastoma (adrenal gland)
<b>187</b>	Ganglioneuroma (adrenal gland)
<b>188</b>	Basal cell carcinoma (skin)
<b>189</b>	Intradermal melanocytic nevus (skin)
<b>190</b>	Seborrheic keratosis (skin)
<b>191</b>	Lichen planus (skin)
<b>192</b>	Psoriasis (skin)
<b>195</b>	Acral lentiginous melanoma (skin)
<b>197</b>	Infiltrating urothelial carcinoma (urinary bladder)
<b>199</b>	Ganglioneuroblastoma (post mediastinum)
<b>200</b>	Normal (bone marrow)
<b>202</b>	Erythroid hypocellularity (bone marrow)
<b>203</b>	Myeloid hypocellularity (bone marrow)
<b>210</b>	Acute leukemia (bone marrow)
<b>214</b>	Metastatic carcinoma
<b>215</b>	Malignant lymphoma involving bone marrow
<b>219</b>	Acute pancreatitis (pancreas)
<b>220</b>	Islet cell tumor (pancreas)
<b>221</b>	Focal nodular hyperplasia (liver)
<b>223</b>	Hepatocellular carcinoma (liver)
<b>224</b>	Ductal adenocarcinoma (pancreas)
<b>225</b>	Cavernous hemangioma (liver)
<b>234</b>	Squamous cell carcinoma (esophagus)
<b>239</b>	TB enteritis (small intestine)
<b>244</b>	Signet ring cell carcinoma (Stomach)
<b>☆245</b>	Hemochromatosis (liver) -- Iron stain

<b>247</b>	Cholesterolosis (gallbladder)
<b>253</b>	Atherosclerosis
<b>257</b>	Fibromatosis (abdominal wall)
<b>258</b>	Myxoid/round liposarcoma (thigh)
<b>259</b>	Pleomorphic liposarcoma (thigh)
<b>260</b>	Well differentiated liposarcoma (retroperitoneum)
<b>261</b>	Dedifferentiated liposarcoma (retroperitoneum)
<b>262</b>	Synovial sarcoma (abdominal wall)
<b>263</b>	Alveolar rhabdomyosarcoma (fore arm)
<b>266</b>	Adenocarcinoma (stomach)
<b>267</b>	Carcinoid tumor (colon)
<b>268</b>	Glioblastoma multiform (brain)
<b>273</b>	HBV infection, ground glass hepatocyte (Liver)
<b>275</b>	Alcoholic cirrhosis (liver)
<b>276</b>	Aspergillus (maxillary sinus)
<b>☆277</b>	Aspergillus (maxillary sinus)--GMS stain
<b>☆278</b>	Aspergillus (maxillary sinus)--PAS stain
<b>279</b>	Mucormycosis (Brain)
<b>☆280</b>	Mucormycosis (Brain)--GMS stain
<b>☆281</b>	Mucormycosis (Brain)--PAS stain
<b>☆282</b>	Chronic active gastritis, helicobacter related (stomach) -- Giemsa stain
<b>283</b>	Glioblastoma (S/P CCRT, recurrence) (Brain)
<b>284</b>	Oligodendrogioma (Brain)
<b>285</b>	Meningioma (Brain)
<b>286</b>	Glioblastoma (Brain)
<b>287</b>	Metastatic carcinoma (Brain)
